

PRODUCT DETAILS

Product shelf life	Garlic Pike is to be kept both open and unopened in the refrigerator below +6 c temperature. Once opened, the product will keep for about a week amount, unopened for a month from the date of packing.
Origin	We use only local fish in our products. We catch the fish ourselves, and as needed, buy from local professional fishermen. The other ingredients we use are also domestic.
Eating Restrictions	When the portion size of our product is small (approx. 20 grams / person), can our customers without worry enjoy our product. We use as a reference to the food agency's dose recommendation 100g pike 1-2 times a month. We do not, however, recommend the product to pregnant women and for nursing mothers.
Parasitic risk	Ingesting the product is completely safe, for we freeze the fish for at least two for the day before salting and further processing.

The product has been carefully researched and approved and is tested regularly.
